AIMS: RDP is intended to provide an introduction to three topics that are central to much of astrophysical and planetary sciences, but which are rarely encountered at undergraduate level. We will start with an introduction to the description of radiation fields, and work that through to an understanding of how planetary and stellar atmospheres can be modeled (though we won’t go too far into these interesting topics). We will then introduce the magnetohydrodynamic (MHD) description for magnetized fluids, discuss how MHD relates to other descriptions of fluids and plasmas, and apply MHD to some topical problems. Finally we will cover gravitational dynamics, giving about 50/50 weight to consideration of planetary dynamics and to the dynamics of stars in star clusters and galaxies.

TEXTBOOKS: There is no single book for the whole class, and so nothing is specified as required. I’ll be making use of:

“Radiative Processes in Astrophysics” (Rybicki & Lightman) for the introduction to radiative transport

A variety of sources for magnetohydrodynamics, including the very useful “Essential MHD for Astrophysics” (Spruit) http://arxiv.org/abs/1301.5572

“Galactic Dynamics” (Binney & Tremaine) for the dynamics, supplemented by additional references for the planetary part.

Both Rybicki & Lightman and Binney & Tremaine are classic texts that are well worth having, but they’re not essential for the class.

ASSESSMENT: Since this is one of the core classes, we will try to get some practice in solving “COMPS-like” questions under exam conditions. 50% of the grade will be for three in class midterms, one for each of the three main topics of the class. The other 50% will be for homework. My intention is to set short, frequent homeworks with a short turnaround, so that we get to review the material in near real time.

DISABILITIES: If you qualify for accommodations because of a disability, please submit to me a letter from Disability Services in a timely manner (for exam accommodations at least one week prior to the exam) so that your needs can be addressed. Disability Services determines accommodations based on documented
disabilities. Contact Disability Services at 303-492-8671 or by e-mail at dsinfo@colorado.edu. If you have a temporary medical condition or injury please let me know.

**RELIGIOUS OBSERVANCES:** Campus policy regarding religious observances requires that faculty make every effort to deal reasonably and fairly with all students who, because of religious obligations, have conflicts with scheduled exams, assignments or required attendance. Let me know if any such issues arise. See full details of the campus policy at [http://www.colorado.edu/policies/fac_relig.html](http://www.colorado.edu/policies/fac_relig.html)

**LEARNING ENVIRONMENT:** Students and faculty each have responsibility for maintaining an appropriate learning environment. Those who fail to adhere to such behavioral standards may be subject to discipline. Professional courtesy and sensitivity are especially important with respect to individuals and topics dealing with differences of race, color, culture, religion, creed, politics, veteran’s status, sexual orientation, gender, gender identity and gender expression, age, disability, and nationalities. Class rosters are provided to the instructor with the student’s legal name. I will gladly honor your request to address you by an alternate name or gender pronoun. Please advise me of this preference early in the semester so that I may make appropriate changes to my records. See policies at [http://www.colorado.edu/policies/classbehavior.html](http://www.colorado.edu/policies/classbehavior.html)

**DISCRIMINATION AND HARASSMENT:** The University of Colorado Boulder (CU-Boulder) is committed to maintaining a positive learning, working, and living environment. CU-Boulder will not tolerate acts of discrimination or harassment based upon Protected Classes or related retaliation against or by any employee or student. For purposes of this CU-Boulder policy, “Protected Classes” refers to race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy. Individuals who believe they have been discriminated against should contact the Office of Discrimination and Harassment (ODH) at 303-492-2127 or the Office of Student Conduct (OSC) at 303-492-5550. Information about the ODH, the above referenced policies, and the campus resources available to assist individuals regarding discrimination or harassment can be obtained at [http://hr.colorado.edu/dh/](http://hr.colorado.edu/dh/)
